PDFreactor Quick Start Guide

1 DOWNLOAD

Go to www.pdfreactor.com/download and download a PDFreactor package suitable for your system environment.

If you don't have a license key you can get a trial key at https://www.pdfreactor.com/request-trial/.

INSTALLATION 2

Open the PDFreactor package you just downloaded and…

- …run the Windows installer
- …unpack the archive or use the RPM
- …run the OS X installer

3 INTEGRATION

Java library: Add the `PDFreactor/lib/pdfreactor.jar` file to your project's classpath.

.NET, PHP, Python, Perl, Ruby, JavaScript, Node.js: Go to the `PDFreactor/wrappers/` directory and copy the library that matches your integration language.

REST or **SOAP:** Visit http://localhost:9423/service for more information.

CONVERSION 4

```
PDFreactor pdfReactor = new PDFreactor();

Configuration config = new Config();

config.setDocument(
    "<html><body>Hello World</body></html>");

Result result = pdfReactor.convert(config);

byte[] pdfBytes = result.getDocument();
```
